## DETAILED ACTION

### *Response to Arguments*

1. Applicant's arguments with respect to claims 20 and 21 have been considered but are moot in view of the new ground(s) of rejection.

### *Claim Objections*

2. Claims 20 and 21 are objected to because of the following informalities:

Claim 20, line 1, "the" (beam) change to - - a - -;

Claim 21, line 2, "a" (directed beam) change to - - the - -.

3. Appropriate correction is required.

### *Claim Rejections - 35 USC § 102*

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

5. Claim 20 is rejected under 35 U.S.C. 102(e) as being anticipated by George (USP. 6,116,748).

Claims (method) 20 given the apparatus for directing a beam pattern of at least one light emitting diode, the method for the apparatus as claimed in claim 21 is inherent.

Regarding claim 20, George disclose a method for directing a beam pattern of at least one light emitting diode in Fig. 5 and 6, comprising the steps of:

Art Unit: 2821

Placing a primary lens (50) in the beam path of each of the light emitting diodes (46)  
(Col. 3, Line 20).

***Allowable Subject Matter***

6. Claim 21 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Reasons for Allowance***

7. The following is a statement of reasons for the indication of allowable subject matter:  
Prior art fails to disclose or suggest the combination of the limitations in claim 21: the method of placing a zoom lens in the directed beam pattern from the at least one primary lens and varying the distance between the at least one primary lens and the zoom lens to focus the beam pattern of the light emitting diode.

***Citation of relevant prior art***

Prior art George (USP. 6,116,748) disclose aisle lighting system.
